Eagle Builders
2675 Skypark Drive, #308
Torrance, CA 90505

Tim,

We want to thank you and your crew for the great work you recently completed on the Seismic Retrofit of our Old Church. Your prior experience with historic buildings and adobe really was evident by the way you treated our treasured Church throughout the project. We know that this was not an easy project, dealing with old buildings always brings surprises, but you handled it very well. We also appreciated your hands-on style and your being there every day so, if an issue came up, it would be handled quickly. You communicated well with the structural engineer and were able to resolve technical issues quickly. You and your crew also communicated very well with us and were very willing to answer questions and let us know how things were progressing.

We also appreciated you continuing on after the seismic work was completed to help us install new lighting, sound and security systems while ensuring that the interior of our historic Church remained essentially unchanged. Your removal of old, no longer used conduit in the interior and occasional patching, along with the careful brush cleaning of the walls and altar, actually improved the look of the interior.

In summary, we are very happy with Eagle Builders' outstanding work performed here and would be more than happy to recommend you to future prospective clients.

Sincerely,

A handwritten signature in black ink that reads "Fr. David Gaa".
